Registration questions

Rationale

We ask a range of questions as part of registration, most of them mandatory to align with other SSI activities and events. The information gathered allows for

1. Reporting to our funders and supporters (demographic data around diversity, domain, career stage, funders and geographic area come into this category)
2. Running activities effectively such as discussion groups (participation and logistical questions come into this category)
3. To collect information to change our behaviour (e.g. to find out where gaps might be in supporting research software or topics for a future workshop)

You can read more at <https://github.com/software-saved/common-form-questions>

Questions

Questions marked with an asterisk (*) are asked for in-person ticket types only.

To make this event fair and inclusive to everyone, you will need to read, agree to and abide by our Participation Guidelines (<https://www.software.ac.uk/cw24-participation-guidelines>).
